Easebuzz Intake

1. Average Ticket Size (ATS) & Procedure Breakdown

Blended ATS ₹50,000

Clinaza's clinic network focuses on **high-ticket elective procedures** where patients defer treatment due to upfront lump-sum costs:

PROCEDURE	TICKET RANGE	EMI TENURE
Dental Implants (Single / Full Arch)	₹35,000 - ₹70,000	6-12 months
Invisible Aligners (Clear Aligner Therapy)	₹50,000 - ₹1,20,000	9-18 months
Full-Mouth Rehabilitation & Prosthodontics	₹40,000 - ₹1,50,000	12-24 months
Cosmetic Smile Design & Root Canal	₹18,000 - ₹35,000	3-6 months

Low Default Risk: Healthcare EMI portfolios carry the lowest NPA rates in retail lending (<1.2%) — patients maintain repayment discipline due to ongoing clinical follow-ups and a trusted doctor relationship.

2 & 3. Projected Cardless EMI Cases & Monthly GMV

Growth Trajectory

ONBOARDING STAGE	ACTIVE CLINICS	LOANS / MONTH	MONTHLY GMV
Immediate Network Launch — Full Active Cohort	28 Clinics	200 - 250	₹1.00 - ₹1.15 Crore
Expansion Phase — Months 3–6 Scale	55 Clinics	400 - 450	₹2.00 - ₹2.25 Crore
Annual Run-Rate Horizon — Year 1 Target	100+ Clinics	800+	₹4.00+ Crore

Conversion Benchmark: 1 in 3 chairside consultations quoted above ₹35,000 opts for monthly EMIs — immediately unblocking deferred treatments and lifting clinic revenue by 25–40%.

4. EXPECTED DESK TRAFFIC — ETB VS NTB SPLIT

Counter Intake Dynamics

750–850 front-desk patient eligibility checks per month

Blended disbursal conversion: ~30%

60% ETB — Pre-Approved Limits (~480-510)	40% NTB — Fresh e-KYC (~320-340)

ETB: Existing-to-Bank Pre-Approved

~480–510 inquiries / month

Urban salaried patients holding **pre-approved cardless credit limits** with Easebuzz lender partners (IDFC FIRST, HDFC, ICICI, Fibe, TVS Credit, Zype). Instant OTP verification yields **65%–70% checkout conversion**.

NTB: Fresh Chairside e-KYC

~320–340 inquiries / month

Patients without existing credit limits who complete a **2-minute digital bureau check** (CIBIL >650) and paperless Aadhaar/PAN verification at the front desk. Approval rate: **40%–50%**.

EASYSPLIT SETTLEMENT ARCHITECTURE & FRONT-DESK UX FLOW

Automated T+1

Direct T+1 Split Settlement

Nodal Flow

Easebuzz's **EasySplit API** automatically bifurcates each transaction at settlement — zero manual reconciliation:

1. **Sub-Merchant Principal Disbursal**
   Treatment principal (e.g. 98.5%) settles directly into the clinic's verified current account on **T+1**.
2. **Platform Fee Split**
   Clinaza platform enablement fee (e.g. 1.5%) routes into Clinaza's current account simultaneously.
3. **RBI Nodal Compliance**
   Zero fund custody or co-mingling. Clinaza never holds or pools medical transaction proceeds at any point.

Chairside Front-Desk Checkout UX

3-Minute Flow

Zero hardware footprint. The entire checkout happens on the patient's phone at the front desk:

1. **Reception Quote & QR Scan**
   Receptionist creates treatment estimate (e.g. ₹60,000). Patient scans Clinaza-Easebuzz QR on counter.
2. **Instant Underwriting & OTP**
   Patient enters mobile. Easebuzz checks ETB pre-approved limits or triggers 2-min paperless KYC.
3. **Immediate Disbursal & Booking**
   Loan approved chairside in real-time. Clinic receives instant SMS confirmation — treatment starts immediately.

Zero Setup Fee Aggregator Model

Clinaza aggregates 28 verified clinics delivering ₹1+ Crore monthly healthcare payment volume on Easebuzz's licensed PA rails.
