Anti-Dormancy Onboarding Protocol 100% Verified Practices

All 10 practices operate active physical consultation counters with designated front-desk staff trained on Clinaza's QR financing workflow. Verified practice documents (PAN, GST/Udyam, Cancelled Cheque) are pre-collected and ready for seamless digital onboarding agreement execution.

TECHNICAL INTEGRATION SPECIFICATION

End-to-End In-Clinic Patient Journey & Architecture

Doctor pre-checks patient credit limit chairside ➔ Full procedure financed OR Split Payment (Counter Down Payment + Balance EMI) ➔ Patient completes private OTP & e-NACH on smartphone ➔ Instant S2S webhook disbursal.

STEP 01
Pre-Check Limit
Patient scans static desk QR standee OR desk queries mobile in Clinaza to check pre-approved credit limits.

Standee QR / In-Store API

STEP 02
Estimate & Split
If limit covers 100% ➔ Full EMI. If ₹1L cost and ₹70K limit ➔ ₹30K desk down-payment + ₹70K balance EMI.

Split / Full EMI

STEP 03
WhatsApp / SMS Link
Desk pushes instant WhatsApp/SMS payment link to patient's phone. Web SDK opens modal for the net balance.

Instant Mobile Link

STEP 04
OTP & e-Mandate
Patient selects tenure (3–24 mo), enters bank OTP, and signs digital e-NACH mandate on their own phone.

Bank OTP / e-NACH

STEP 05
Disbursal & Start
Flexmoney dispatches real-time webhook. Doctor sees 100% secured funds; treatment starts immediately!

Real-Time Webhook

Clinaza Split-Payment Affordability Engine (e.g. ₹1,00,000 Treatment):
Case A (100% Limit Available): Treatment ₹70,000 | Pre-approved limit ₹80,000 ➔ **100% converted to monthly EMIs** with zero cash down.
Case B (Partial Limit / Co-Pay): Treatment ₹1,00,000 | Pre-approved limit ₹70,000 ➔ Patient pays **₹30,000 Down Payment** at clinic counter (UPI/Card/Cash) + **₹70,000 balance on monthly EMIs via Flexmoney InstaCred**. Eliminates treatment deferrals and eliminates clinic bad debt!

FLEXMONEY DEVELOPER INTEGRATION SUITES (FLEXMONEY.IN/DEVELOPERS):

Architecture Selection

1. Web SDK
JAVASCRIPT / TYPESCRIPT · PRIMARY PATIENT FLOW

Drop-in responsive checkout modal embedded directly into Clinaza mobile web checkout. When patient clicks the instant WhatsApp / SMS payment link on their smartphone, the SDK handles mobile OTP authentication, multi-lender credit line selection (3–24 months), and digital mandate completion privately on the patient's device.

✓ Single <script> tag setup with responsive, visually native UI
✓ Private OTP verification & tenure selection (no receptionist screen peeking)
✓ Paperless e-NACH auto-debit setup in under 2 minutes

2. API Suite — Online
REST API · PRIMARY BACKEND ENGINE

Server-to-server REST integration for complete transaction lifecycle management. Clinaza backend creates order tokens, passes clinic identifiers, tracks transaction states, and consumes real-time webhook callbacks upon loan approval and disbursement to unlock immediate chairside treatment.

✓ Eligibility check & S2S order token generation
✓ Multi-lender dynamic routing & offer surfacing across banking rails
✓ Real-time webhook callbacks for instant sanction & disbursal status

3. API Suite — In-store
REST API · DESK PRE-CHECK

Purpose-built API for assisted counter pre-qualification. Receptionists enter patient mobile number to perform an instant soft credit limit check across lenders before the doctor presents the final high-ticket procedure estimate (implants, aligners, rehabilitation).

✓ Instant pre-approved credit visibility prior to consultation
✓ Reduces drop-offs for high-ticket (₹50K–₹2L) planned treatments
✓ Zero documentation required for pre-qualification

4. CRM Integration
REST API / WEBHOOKS · PRACTICE OS SYNC

Direct synchronization of Flexmoney transaction events into Clinaza's clinic operating system. Automatically updates patient treatment records, flags approved EMI disbursements, reconciles practice accounts, and schedules procedure appointments.

✓ Real-time loan status push directly into clinic CRM calendar
✓ Automated clinical chart update upon disbursal confirmation
✓ End-of-day financial reconciliation for practice accountants

Clinaza (Desk OS & In-Clinic Flow)
- Doctor case creation & treatment estimates
- Standee QR for limit check & WhatsApp billing links
- Real-time practice dashboard & clinic training
- 100% treatment verification (zero cash-out)

Flexmoney InstaCred (Affordability)
- Pre-qualification check by mobile number
- Multi-lender credit scoring & dynamic routing
- Mobile OTP authentication & e-mandate (e-NACH)
- Drop-in Web SDK checkout modal

Lender Network (Capital Rail)
- Banks: HDFC, ICICI, Kotak, Axis, Federal, IDFC
- NBFCs: TVS Credit, Zype, Fibe instant sanction
- Automated underwriting & risk scoring
- Direct disbursement to clinic Current Account
